SUMMARY

Full Stack Developer passionate about building impactful applications and leveraging AI tools and autonomous agents to accelerate development and solve real-world problems. Strong foundation in Data Structures and Algorithms, DBMS, and OOPs with experience building scalable web applications.

EDUCATION

ABES Engineering College	2023 – Present
B.Tech in Computer Science Engineering	Percentage: 75.98%
Loyola High School	2022
Class XII	Percentage: 92.8%
Sadar Alam Memorial Secondary School	2020
Class X	Percentage: 90.8%

SKILLS

- **Languages:** Java, JavaScript, SQL
- **Backend:** Node.js, Express.js, REST APIs
- **Frontend:** React.js, HTML, CSS
- **Databases:** PostgreSQL, MySQL, MongoDB
- **Core CS:** Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks
- **AI & Tools:** LLM APIs, RAG, Docker, Postman, Appwrite, Vercel, Railway, VS Code, Git, Github

ACHIEVEMENTS

- **National Finalist - HCL GUVI Buildathon 2026:** Top 2% nationally; built an Agentic HoneyPot System to interact with scam messages and collect key details from conversations. [Certificate]
- **LeetCode Rating: 1630:** 468+ problems solved in Java Programming Language.
- **GSSoC'25 Open Source Contributor:** Merged PR implementing email notification module + REST API endpoint in LegalHub; completed full code review and integration cycle.
- **Smart India Hackathon 2025 - Internal Shortlist:** Contributed backend APIs and ML integration to YieldX platform.

EXPERIENCE

MERN Developer Intern	<i>Olinp Technology Pvt. Ltd.</i>
• Migrated a legacy codebase to a modern tech stack by developing modular, reusable React components alongside the shadcn/ui library. • Analyzed user requirements and collaborated with product design teams to ensure consistent UI patterns and responsive design layout.	

PROJECTS

AI-Powered HoneyPot System: Node.js, REST APIs, Groq API (Live)	<i>HCL GUVI Buildathon</i>
• Developed a Node.js backend system that parses incoming chat sequences to dynamically isolate credential strings, UPI IDs, and links. • Implemented structured error-handling and automated multi-key rotation logic for upstream APIs, integrating a secondary fallback path to guarantee high service availability. • Monitored system uptime and response reliability across multiple test conversations to track runtime agent interactions.	
AI-Native CRM Platform React.js, Node.js, PostgreSQL, Prisma, Gemini API (Live)	
• Engineered a full-stack relational CRM platform using PostgreSQL and Prisma to securely capture customer profiles and campaign interactions. • Designed clean, modular REST API endpoints to process audience segmentation parameters and trigger text-generation sequences. • Streamlined structural database querying flows, keeping latency low and data retrieval quick for multi-field search lookups.	

Event Manager | React Native(Basic), Node.js, Express.js (Live)

React Native, Appwrite

- Developed a cross-platform mobile application with isolated authentication routing tailored to administrative and student-facing workflows.
- Created backend verification checks within Appwrite database CRUD routines to intercept and block duplicate registration entities automatically.

ACTIVITIES

- **Secretary, ACM Student Chapter - ABESEC:** Organized technical events, coding contests, and workshops; managed logistics for 200+ student participants.
- **College Badminton Club:** Participant in intra-college matches.
